

Profile Summary

Detail-oriented Information Technology undergraduate with practical experience in requirements analysis, manual QA testing, and API validation. Familiar with Agile environments and translating business needs into functional, testable solutions. Seeking a BA or QA internship to apply analytical, testing, and documentation skills in a professional software development setting. | Portfolio: <https://hashini-portfolio.vercel.app>

TECHNICAL Skill

- Business Analysis & QA:** Requirements gathering, user stories, use cases, process flows, manual test case design, functional, API, CRUD and regression testing, defect reporting.
- Technical:** JavaScript, React.js, Java (Spring Boot), Node.js, Express.js, PHP, Python, RESTful APIs.
- Databases:** PostgreSQL, MySQL, MongoDB.
- Tools:** Postman, Git/GitHub, VS Code, IntelliJ IDEA.
- Methodologies:** Agile/Scrum, SDLC, basic CI/CD awareness.

Professional Skills

- Analytical and critical thinking
- Attention to detail and quality mindset
- Time management and task prioritization
- Clear documentation and reporting
- Problem solving and root cause analysis
- Collaboration in cross-functional teams

Soft Skills

- Analytical thinking
- Attention to detail
- Clear documentation
- Adaptability
- Communication & teamwork
- Time management
- Problem solving

Project Experience

MediSync – Appointment Scheduling System | Full-Stack

React, Spring Boot, PostgreSQL, REST APIs

- Analyzed appointment booking requirements and defined user flows and validation rules.
- Implemented and tested booking, time-slot management, and email reminder functionality.
- Performed API and integration testing using Postman across billing and patient modules.

Foodie – Social Learning Platform | Quality Assurance | Developer

Selenium, Spring Boot, PostgreSQL

- Designed and executed Selenium-based automated test cases to verify functional correctness and data integrity
- Designed and validated lesson creation workflows with form and data-level validation.
- Created test scenarios for lesson management and filtering features.

Charity Management System | Quality Assurance | Developer

Selenium, MongoDB, Express.js

- Executed Selenium automated tests to validate functional correctness and data integrity.
- Developed and validated donor and volunteer management features.
- Conducted end-to-end testing for donation processing and reporting modules

Education

BSc (Hons) in Information Technology

Sri Lanka Institute of Information Technology (SLIIT)

Present - 2022

Diploma in English

BritishWay English Academy

2024
